Interdental Cleaning

TePe has a long tradition of developing products for preventive dental care with special focus on interdental cleaning. Our range offers a variety of options to facilitate daily interdental self-care for all.
TePe EasyPick™

Interdental cleaning made easy, suitable for many user groups. It is durable and flexible with a steady grip. The silicone coating efficiently removes plaque and feels comfortable on the gums. Recommended for daily use, alone or as a complement to other interdental cleaning products. Safe for use around orthodontic appliances, implants and bridges.

- Easy interdental cleaning
- Flexible for easy reach
- Use on the go – anytime, anywhere

EasyPick is available in two conical sizes, XS/S and M/L, to fit tight as well as large interdental spaces. It should never be forced into a space.

A handy pocket case is included in every pack.
TePe Interdental Brush original

The original range of TePe Interdental Brushes comprises nine colour coded sizes to fit narrow and wider interdental spaces. All brushes have plastic coated wire for safety and comfort. The user-friendly handle offers a stable grip which enables cleaning with controlled movements.

The smaller brush sizes (0–3) have a flexible neck for increased durability and access. The larger brush sizes (4–8) have a thicker bendable wire.

Sizes 0–3: Curve the flexible neck for improved access between the posterior teeth.

Sizes 4–8: Curve the wire for improved access between the posterior teeth.

The plastic cap can be used for hygienic protection of the brush or to extend the handle.
TePe Interdental Brush extra soft

This unique range of interdental Brushes has extra soft filaments for gentle cleaning. It comprises six sizes, all with plastic coated wire for safe use. The colour coded sizes correspond to the original range, but in pastel colours.

Areas of use:
- After oral surgery
- Sore gingiva
- Dry mouth
- Sensitive teeth
- For everyone who prefers a softer brush

TePe Interdental Brushes – the professional choice

TePe’s first interdental brushes were produced in 1993. The initial three sizes were progressively followed by a diversity of sizes and designs. Today they are recognised for their high quality and efficiency worldwide.

Our strong position on the home market is reflected in sales figures from Swedish pharmacies, where 83% of interdental brushes purchased come from TePe.

Nielsen, pharmacy total, MAT TY (interdental brushes) 2014-10-06.
TePe Angle™

TePe Angle is designed for controlled and convenient interdental cleaning. It has an angled brush head for easier access, especially between the posterior teeth and from the palatal and lingual sides. The long and flat handle offers a stable and ergonomic grip. TePe Angle is a good choice for those who prefer a longer handle or when dexterity is reduced.

To fit both narrow and wider interdental spaces, TePe Angle is available in six colour coded sizes, corresponding to the original TePe interdental brush range. All sizes have plastic coated wire for gentle cleaning.

- Small, angled brush head for optimal reach
- Long, flat handle for a stable grip
- Plastic coated wire for safe use
- Six colour coded sizes

Posterior cleaning from the buccal side.
Posterior cleaning from the lingual side.
Anterior cleaning from the lingual side.
Cleaning of implants from the buccal side.
Cleaning of implants from the palatal side.
Quality in every detail

Using an interdental brush is a highly effective way to remove dental plaque between the teeth. TePe’s interdental brushes are developed in collaboration with dental experts to certify the highest efficiency, comfort and quality. They are continuously tested and evaluated to meet the demands of consumers and professionals worldwide.

The wide TePe interdental brush range offers an option for everybody – several sizes, two filament textures and two handle lengths with a straight or angled brush head. The sizes are colour coded for easy identification. Handles are made of recyclable polypropylene.

The brushes comply with the international standard for manual interdental brushes (ISO 16409:2006) which stipulates nine sizes, 0-8. TePe offers brushes in all nine sizes to cover the whole span of interdental space varieties.

![Image of interdental brushes]

It is important to select the correct size. The brush must never be forced into a space. All sizes and models have plastic coated wire for gentle cleaning.

The ISO brush size is based on the measurement of the smallest hole which the brush can pass through, the passage hole diameter (PHD).

Interdental brushes are shown to be effective devices for interdental cleaning, more effective than dental floss or wooden sticks. Interdental brushes also have a positive effect on plaque scores, bleeding scores and probing pocket depth.

**Slot DE, et al.**
The efficacy of interdental brushes on plaque and parameters of periodontal inflammation: a systematic review.

**Imai PH, et al.**
Comparison of interdental brush to dental floss for reduction of clinical parameters of periodontal disease: a systematic review.
Accessories

1. Practice Box
Ideal for keeping TePe's interdental brushes within easy reach at the dental practice. Useful when trying out the correct size and instructing the patient. It can be filled with brushes from the multi-pack. A useful information chart with brush sizes is included. The practice box for original and extra soft brushes has eight removable cases and the TePe Angle box has four cases. Each case holds 15 brushes.

2. Multi-pack
TePe’s interdental brushes are available in single size packs of 25 brushes with individual plastic caps (grey and black without caps).

3. Travel Case
A practical travel case that fits six TePe Interdental Brushes original or extra soft. Airholes for good ventilation, allowing the filaments to dry.

4. Micro Holder
Hygienic storage of interdental brushes at home. The micro holder fits four interdental brushes.

5. Dental Model
The unique dental model has several educational features. It is useful for instructing cleaning techniques with TePe's interdental brushes and many other oral hygiene devices.

   The model shows:
   • Crowding
   • Missing tooth
   • Rotated, lingually inclined premolar
   • Mesially inclined molar
   • Furcation grade III
   • Partially erupted third molar
TePe Gingival Gel with Chlorhexidine and Fluoride

This antibacterial gel combines the advantages of chlorhexidine (0.2%) and fluoride (0.32% NaF) for double protection of gums and teeth. Chlorhexidine has an antiplaque and antigingivitis effect, while fluoride prevents caries and protects sensitive root surfaces.

TePe Gingival Gel contains no abrasives and no alcohol. The mint flavour and smooth formula enable pleasant and easy use with an interdental brush.

Areas of use:
- Gingivitis
- Periodontitis
- Peri-implant mucositis
- Peri-implantitis
- High caries activity

Local application of chlorhexidine with an interdental brush has been shown to have a positive effect on gingival inflammation.

Lee YC, et al.
The effect of local application of chlorhexidine on plaque and gingivitis.

Thanks to its efficacy, chlorhexidine is considered the gold standard in the field of antiplaque and antigingivitis agents.

Jones CG
Chlorhexidine: is it still the gold standard?
TePe Interdental Gel with Fluoride

TePe’s fluoride gel (0.32% NaF, 1500 ppm) is specially developed for efficient caries protection of the approximal surfaces. It has a fresh mint flavour and contains no abrasives. Fluoride strengthens the enamel, heals surfaces with early signs of caries and slows down the demineralisation process. It is also known to alleviate tooth sensitivity. TePe Interdental Gel is recommended for general use, but is particularly beneficial to patients with high caries risk.

Ideal in cases of increased caries risk:

- High caries activity
- Crowns and bridges
- Approximal fillings
- Exposed root surfaces, e.g., furcations
- Dry mouth

Clinical studies prove that the use of fluoride gel in combination with an interdental brush is a more effective method of approximal fluoride distribution than other comparable methods.

Särner B, et al.
Fluoride release from NaF- and AmF-impregnated toothpicks and dental flosses in vitro and in vivo.

Särner B, et al.
Approximal fluoride concentration using different fluoridated products alone or in combination.
**TePe Mini Flosser™**

A pre-loaded dental floss holder for easy and convenient use, even in very narrow interdental spaces. The cleverly designed bite plane helps to gently insert the floss. The handle fits comfortably in the hand.

- Bite plane for safe and easy use
- Small and slender handle
- Easy access to tight interdental spaces

![TePe Mini Flosser](image)

**TePe Plastic Dental Sticks**

TePe’s plastic sticks are suitable for very narrow interdental spaces. They are slim and flexible for easy reach, also between the posterior teeth. The slightly textured surface ensures an efficient cleaning.

![TePe Plastic Dental Sticks](image)

**TePe Wooden Dental Sticks**

The wooden sticks are triangular to fit the natural shape of the interdental space. They are available in three sizes with or without fluoride.

- X-slim: birch
- Slim: birch
- Medium: linden

![TePe Wooden Dental Sticks](image)

**The TePe toothbrush – a modern classic**

Generations of Swedes have grown up with TePe on their bathroom shelves. The user-friendly toothbrush was introduced in 1973 and is still an everyday favourite – more than 27.5% of all toothbrushes purchased in Sweden are TePe branded.

Nielsen, retail+pharmacy, MAT TY (toothbrushes) 2015-10-04.
Toothbrushing

TePe’s user-friendly toothbrushes are developed for efficient and gentle plaque removal. A variety of models and sizes facilitate daily oral care for adults and children.
**TePe Supreme™**
Soft filaments in two levels for improved access. The longer filaments clean further in between the teeth and along the gum line, while the shorter filaments efficiently clean the rest of the tooth surfaces. Tapered brush head and a stable, non-slip handle. The neck can be angled without heating.

**TePe Nova**
The easy-reach tip gives maximum access to difficult to reach areas, especially around the posterior teeth. Ergonomic, non-slip handle and tapered brush head. Neck can be angled without heating. Pink: x-soft. Yellow: soft. Blue: medium.

**TePe Select™**
This premium quality toothbrush with tapered brush head and ergonomic handle suits everyone. X-soft, soft or medium.

**TePe Select™ Compact**
Recommended for children, but also for adults who prefer a smaller brush head. User-friendly handle which suits both children and adults. X-soft, soft or medium.

**TePe Mini™**
TePe Mini is suitable from the first tooth until 3 years of age. The handle provides a stable grip for the adult brushing the child’s teeth, but fits just as well in a small hand. X-soft or soft.
**Brush Head Cap**
The practical cap suits most TePe toothbrushes and special brushes.

**TePe Graphic™**
TePe Select with illustrations and coloured filaments. Soft.

**TePe Kids™**
Select Compact with illustrations, TePe Kids, is recommended from 3 years and up. X-soft or soft.

**TePe Mini™**
TePe Mini is available with charming prints created by Swedish Isa Form. Recommended from the first tooth. X-soft.

Our Select toothbrushes are also available with winter prints.
Information online

In-depth product facts, user tips and pedagogic videos for professionals and patients are available on www.tepe.com. Our website adapts to all screens and devices.

TePe PlaqSearch™

PlaqSearch is a two-tone disclosing product to visualise plaque, colouring new plaque red and old plaque blue. It clearly shows the areas that need extra care. PlaqSearch is used at the dental practice for patient instruction and as an educational tool for teaching proper cleaning techniques. It is also convenient to use at home for self-assessed control and improved oral hygiene routines.

PlaqSearch is available as chewing tablets for use at the dental practice and at home, as well as a disclosing solution for professional use.

- Educational and easy method to visualise plaque
- Differentiates new and old plaque
- Helps to prevent caries and gingivitis

Drip the solution into a dappen dish.
Dip a cotton pellet and apply on the tooth surfaces.
Red shows new plaque and blue shows plaque older than 12 hours.
Imprinting Service

TePe’s imprinting service offers customised oral health care products for promotional use – an excellent marketing opportunity for dental practices and businesses.

Logotypes, illustrations and messages can be printed on our Select and Select Compact toothbrushes, as well as on dental stick pocket cases. The choice between numerous handle colours in combination with up to five print colours opens up endless possibilities. Please contact us for detailed information or read more at www.tepe.com.
Special Products

TePe offers a wide range of cleaning devices developed for individuals with specific oral hygiene needs. Close collaboration with dental professionals ensures excellent function and a high level of quality. All products are clinically tested and evaluated.
**TePe Implant Care™**

The unique, angled neck of Implant Care enables easy access to the lingual and palatal surfaces of implants. A small brush head with long filaments facilitates reach under the prosthetic construction. Implant Care is also suitable for retroclined teeth, lingual orthodontic appliances and other difficult-to-reach areas.

**TePe Implant/Orthodontic Brush**

A long, thin neck and an extra slim brush head make this brush ideal for cleaning the buccal sides of implants and around orthodontic appliances.

**TePe Bridge & Implant Floss**

A spongy filament floss specially designed for easy and efficient cleaning of implants, bridges and orthodontic appliances. The floss is equipped with stiff plastic ends for easy insertion.

**TePe Implant Care™ – uniquely angled**

The innovative Implant Care was launched in 2009 to meet the demand for a brush that could easily access implant surfaces from the inside. The design was expertly and carefully created to facilitate cleaning in narrow areas. Implant Care was met by great acclaim from the dental community and continues to be an appreciated part of our Special Products portfolio.
**TePe Compact Tuft™**
Small, angled brush head with a dense, rounded tuft. Ideal for precision cleaning of areas that need special attention.

**TePe Interspace™**
An angled brush with a tapered brush tip for optimal access in difficult-to-reach areas.

**TePe Special Care™**
Special Care with 12,000 ultrasoft filaments is recommended after oral surgery and for patients with extremely sore and delicate oral tissues. Two brush head sizes: regular (red), compact (blue).

Areas of use:
- After oral surgery
- Sore oral tissues
- After trauma
- Radiotherapy treatment

**TePe Gentle Care™**
Gentle Care has xx-soft filaments, somewhat firmer than Special Care. Regular brush head.

Areas of use:
- After oral surgery
- Sensitive oral tissues
- After trauma
- Dry mouth
- Sensitive root surfaces
**TePe Tongue Cleaner**

Most cases of halitosis are caused by bacteria on the tongue. Removing the bacteria with a tongue cleaner helps to prevent bad breath and improve oral health. TePe’s tongue cleaner has a slim design which reduces the gag reflex and enables easy reach further back in the mouth. It has three contoured cleaning surfaces for efficient removal of bacteria and is made of recyclable polypropylene.

- Removes bacteria with one stroke
- Prevents bad breath
- Dishwasher safe

**TePe Denture Brush**

The denture brush has extra long, strong filaments to ensure good accessibility and efficient cleaning. The brush is designed to resemble a conventional toothbrush.

**TePe Extra Grip**

The extra grip assists persons with reduced manual dexterity. It provides a comfortable, stable grip and weighs only 30 grams. It fits most TePe toothbrushes and special brushes.

Made in Malmö since 1965

The development of new oral care solutions is a constant process, always in line with market requirements and scientific research. TePe’s headquarters and production are located in Malmö, Sweden, under one roof. Here our designers and engineers work closely together with our in-house odontological team to ensure that our products meet the high demands of both professionals and consumers. All products are clinically tested and evaluated to guarantee optimal quality and function.
Healthy Gums

Thorough oral hygiene is essential for maintaining healthy gums and preventing periodontal diseases. Motivating the patient and recommending the appropriate cleaning devices are key factors for efficient self-care.

Patient leaflets, how-to-use videos and more tips are available at www.tepe.com
TePe PlaqSearch™
A two-tone disclosing product to visualise plaque, colouring new plaque red and old plaque blue.

TePe Interdental Brushes
The wide range of sizes and designs enables individually adapted cleaning.

TePe EasyPick™
An easy-to-use cleaning option in two conical sizes for tight to big interdental spaces.

TePe Mini Flosser™
Floss is suitable when interdental spaces are narrow.

TePe Dental Sticks
TePe's dental sticks are triangular for efficient cleaning of the interdental space.

TePe Gingival Gel
Antibacterial gel with chlorhexidine and fluoride. Recommended for a limited period of time as a complement to daily toothbrushing and interdental cleaning.

TePe PlaqSearch™
A two-tone disclosing product to visualise plaque, colouring new plaque red and old plaque blue.

Effective plaque control provides the basis for maintaining gingival health. Toothbrushing and interdental cleaning form the cornerstones of mechanical plaque control.

van der Weijden F, Slot DE
Implant Care

Proper care of implants is vital for long-term success. Professional guidance on good oral hygiene habits and suitable products is of great importance to prevent the development of peri-implant mucositis and peri-implantitis.

Patient leaflets, how-to-use videos and more tips are available at www.tepe.com
Peri-implant inflammation is common among implant patients. Good oral hygiene is of great importance, since poor oral hygiene increases the risk of development and progression of peri-implant disease.

**TePe Implant Care™**
The angled neck facilitates cleaning from the lingual and palatal sides.

**TePe Implant Brush**
Extra slim brush head, suitable for buccal cleaning of an implant-supported bridge.

**TePe Interdental Brushes**
Useful for inter-implant cleaning from the buccal and palatal sides, and under the connecting bar for overdentures.

**TePe EasyPick™**
Strong and flexible with silicone coating for efficient and gentle cleaning.

**TePe Compact Tuft™**
The small tuft facilitates cleaning of implants, and is also suitable around attachments for overdentures.

**TePe Bridge & Implant Floss**
Spongy filament floss for cleaning around implants.
Fixed orthodontic appliances make cleaning more complicated. Plaque rapidly accumulates around brackets, bands and wires. To prevent gingivitis and caries, systematic cleaning is essential.

Patient leaflets, how-to-use videos and more tips are available at [www.tepe.com](http://www.tepe.com)
Fixed orthodontic appliances increase the number of sites where plaque can accumulate. Encouraging patients to maintain a high standard of plaque control is essential to reduce risk of caries and gingivitis.

Srivastava K, et al.  
Risk factors and management of white spot lesions in orthodontics.  

Khalaf K  
Factors affecting the formation, severity and location of white spot lesions during orthodontic treatment with fixed appliances.  

---

**TePe Interspace™**  
The tapered brush tip is ideal for cleaning around brackets and under wires.

**TePe Orthodontic Brush**  
The extra slim brush head enables cleaning around brackets and wires.

**TePe Supreme™**  
The toothbrush with filaments in two levels facilitates access around orthodontic appliances.

**TePe Compact Tuft™**  
The rounded tuft is suitable for cleaning around brackets and along the gum line.

**TePe Interdental Brushes**  
Suitable for cleaning under the wire and for interdental cleaning under the retainer.

**TePe EasyPick™**  
Easy interdental cleaning under the wire or the retainer.

**TePe Bridge & Implant Floss**  
Efficient cleaning around brackets.

**TePe Implant Care™**  
The angled neck facilitates cleaning of lingual orthodontic appliances.
Paedodontic Care

Establishing good oral hygiene routines at a young age is the first step to a healthy mouth throughout life. Once the first tooth emerges, it is time to start using a toothbrush.
TePe Mini™
A toothbrush with an extra small brush head, recommended from the very first tooth up to 3 years of age.

TePe Select™ Compact
This toothbrush has a slightly larger brush head than TePe Mini. Suits children from 3 years and up.

TePe Select™
The larger brush head makes Select suitable for older children.

TePe Compact Tuft™
This single tufted brush is ideal for use on the critical occlusal surface on erupting molars.

Reaccumulation of plaque (coloured areas) 48 hours after professional toothcleaning
Partially erupted molar.
Erupted molar with full chewing function.
Modified by TePe with permission from Prof. P. Axelsson, DDS, Odont. Dr.

TePe PlaqSearch™
Two-tone disclosing tablet, indicating new and old plaque. Convenient tool for teaching proper brushing to children.

TePe Mini Flosser™
Children with increased risk of caries and/or gingivitis need help to clean interdentally. The Mini Flosser offers a stable grip for the adult helping the child.

TePe Special Care™ Compact
A toothbrush with ultrasoft filaments and a small brush head. Recommended after trauma and oral surgery.

Toothbrushing with fluoride toothpaste is of great importance in caries prevention among children and adolescents.

Walsh T, et al.
Fluoride toothpastes of different concentrations for preventing dental caries in children and adolescents.

Cury JA, Tenuta LM
Evidence-based recommendation on toothpaste use.
Demo & Display

TePe offers a range of material for demonstration and information to aid chairside oral hygiene advice. Our product racks are perfect for display and storage.

**Mini Display**
Designed for six toothbrushes and nine interdental brushes. Clear acrylic material. Item no 931 031.

**Interdental Brush Display**
Suitable for 15 interdental brushes. Clear acrylic material. Item no 931 035.

**Small Rack**
Rack in clear acrylic material with four hangers. Height: 20 cm. Width: 40 cm. Depth: 18 cm. Item no 931 032.

**Interdental Brush Table Display**
Cardboard table display with four hang-ers, suitable for interdental brushes. Height: 26 cm. Width: 34.5 cm. Depth: 16 cm. Item no 931 043.

**Vanity Bag**
Can be filled with products and information for your patient. Ideal as a tool for continued oral self-care after treatment. Height: 14 cm. Width: 24.5 cm. Depth: 4.5 cm. Item no 153.

**Dental Model**
This unique, educational dental model is useful for teaching cleaning techniques with TePe’s products. Item no 952 050.
**Large Rack**
Eight hangers and eight plastic containers. Can be mounted on the wall.
Height: 85 cm. Width: 38 cm. Depth: 22 cm.
Item no 931 034.

**Medium Rack**
Rack in clear acrylic material with ten hangers.
Height: 48 cm. Width: 42 cm. Depth: 22 cm.
Item no 931 033.

**Floor Rack**
Rack on wheels. White lacquered metal with 24 detachable hangers and a shelf.
Height: 170.5 cm. Width: 37 cm. Depth: 28 cm.
Item no 182.

**Medium Table Display**
Table display in cardboard with eight hangers.
Height: 51 cm. Width: 37 cm. Depth: 16 cm.
Item no 931 046.

**Information Material**
TePe provides a selection of instructive material for patients as well as dental professionals.

**Product Presentation Case**
Includes the major part of the TePe range and is excellent for product demonstration. Dental Model is not included.
Item no 952 053.
